Hardy AMARYLLIS

Hardy Amaryllis

SQUAMIGERA (Amaryllis Halli) Hardy and Unique

Produces in early spring. Oddly beautiful foliage of dark green which grows until mid-summer. Foliage then dies and disappears. About the first of August stems spring up from the ground to a height of about 3 feet, each of which is topped by an umbel of lily-shaped blooms, sometimes containing as many as a dozen individual flowers. Color is a delicate rose-lilac shade. The bulbs are hardy but must be planted in the fall. The crown of the bulb should have 4 inches of soil over it.

EVERGREENS

• PLEASE NOTE •
All of our Evergreens are carefully dug to get all the tender roots. The soil is then removed and roots puddled in mud; they are then wrapped in moss and paper or burlap. This method of packing eliminates 25 to 50 pounds of soil, saves the vital fine roots, insures better growth and makes possible low cost parcel post or express shipments.
